-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

### DETAILED ACTION

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-4, 6-9, 11-16, 18, 32 and 33 are rejected under 35 U.S.C. 103(a) as being unpatentable over EP' 036 in view of Mandal, Baudin, Muzyczko and Nishikubo.

Claims are rejected for reasons of record. Applicants have argued that the claimed composition undergoes dimerization instead of polymerization as disclosed in the prior art, and that the declaration provided shows difference in properties for the claimed invention. The argument has been considered, but has not been found persuasive. The declaration compares specific entities that are not commensurate in scope to the claims. The evidence of the declaration also cannot be extrapolated to encompass the broad scope of the compositions of the claims. The question of motivation raised by applicants has been addressed, and the position of the examiner remains that the motivation comes directly from the references in that they teach the equivalence of the claimed functionalities to those specifically disclosed in EP' 036 and for the same purpose. The claims, therefore, remain properly rejected under 35 USC 103 as prima facie obvious over the combined references.
